

RECYCLING SPECIALIST II

DEFINITION

To perform a wide variety of duties related to the development and implementation of recycling projects such as source reduction, reuse, recycling, composting and disposal for residential, commercial and industrial waste generators; and to perform related work as assigned.

DISTINGUISHING CHARACTERISTICS

This is the full journey level class within the Recycling Specialist series. Employees at this level receive only occasional instruction or assistance as new or unusual situations arise and are fully aware of the operating procedures and policies within the work unit. Positions in this class are flexibly staffed and are normally filled by advancement from the entry level.

SUPERVISION RECEIVED AND EXERCISED

Receives general supervision from an assigned supervisor; may exercise technical and functional guidance over less experienced staff.

ESSENTIAL FUNCTIONS – Functions may include, but are not limited to, the following:

Conduct audits and waste stream characterizations, including establishing waste stream characterization by weighing and measuring the various components, to assist businesses with developing recycling/diversion programs specific to their needs.

Educate residents and business owners on how to properly divert recyclable materials and dispose of solid waste, household hazardous waste and universal wastes, and proper set out of service containers for each service type.

Assist in contract management of recycling and solid waste franchise service provider including service audits, diversion redemption value allocation studies, vehicle safety inspection and route audits. Route audits comprise all service programs including commercial and residential recycling, solid waste, yard waste and ancillary services such as bulky item pick ups, Christmas tree recycling program, used oil and oil filters collection and other programs as they are implemented.

Work directly with residential, commercial and industrial waste generators to demonstrate proper integrated solid waste management techniques; prepare related reports.

Assist in the development of public document brochures, grant reports, and reports required to meet the state mandated integrated solid waste management administration.

Make informational presentations to business, school, and community groups.
